BEE GEES FEVER

Bee Gees Fever celebrate their 20th Anniversary in 2019 as one of the most celebrated UK Tribute Shows.

Since 1999, Bee Gees Fever have been performing "Completely 100% Live" to venues all over Great Britain and Europe, honing their skills with one purpose in mind - to entertain audiences. And they have been achieving this accolade for two decades now.

The Bee Gees Fever show is a celebration of the music of the brothers Gibb, where they offer to take you back to 1998 for the ultimate "One Night Only" experience for the first half of their Theatre Shows and then take you back even further to 1979 and make you feel like you were actually there on the Bee Gees "Spirits Having Flown" world tour, when, at the end of the 70s, the Bee Gees were officially the biggest band in the world.

This burst of raw live energy was the reason why Blue Weaver endorsed Bee Gees Fever during their show performed to the Bee Gees Worldwide Fan Club Convention in November 2003, when fans from all over the world travelled to Manchester for a weekend to celebrate the life of the Bee Gees.

Blue Weaver was a member of the Bee Gees throughout the 1970s and co-wrote some of the Bee Gees greatest classics, along with Barry, Maurice and Robin, such as Tragedy, Stayin' Alive and Night Fever, and after the Bee Gees Fever show at the Worldwide Fan Club convention in 2003, he came on stage and announced to the audience after the show that seeing Bee Gees Fever performing live on stage tonight was "like seeing the boys going on stage without me."

With added female guest artists, performing songs written by the Bee Gees for other artists, and stunning new visuals, the show just keeps on getting better and better!
